

2023 Lyceum Field Programs

Habitat Management for Grassland Birds and Pollinators Surry Hill, Fayette September, Date TBA

KLT has been working with Laura Suomi-Lecker, statewide grassland bird program manager for Ag Allies, and US Fish and Wildlife biologist Hannah Mullally to improve the Surry Hill fields for grassland bird and pollinator habitat. Join KLT staff, Laura, and Hannah for a field workshop focusing on the project.

History Walk at Rosmarin & Saunders Family Forest and Macdonald Woods Readfield

Saturday October 14, 10 AM

Join Readfield Historian Dale Potter-Clark and Bill Adams, who works with Dale on researching some Readfield properties, to learn more about the history of the Rosmarin & Saunders Family Forest and Macdonald Woods. They'll share more information about the John Dutton family, whose homestead was on West Road in Readfield.

About the Lyceum and KLT

KLT's winter lectures are modeled on the early New England lyceums that began in 1826 in Massachusetts. For many years, New England lyceums hosted lectures, debates, and concerts for public audiences. KLT's March lyceum and the associated field programs are supported by Gloria Williams Ladd.

Location: The 2023 lecture series will take place at the **Winthrop High School Performing Arts Center** (212 Rambler Way, Winthrop, ME 04364).

Directions: From Route 41 in Winthrop, turn onto Rambler Way to the Winthrop High School. Once inside, follow the signs for the Performing Arts Center.

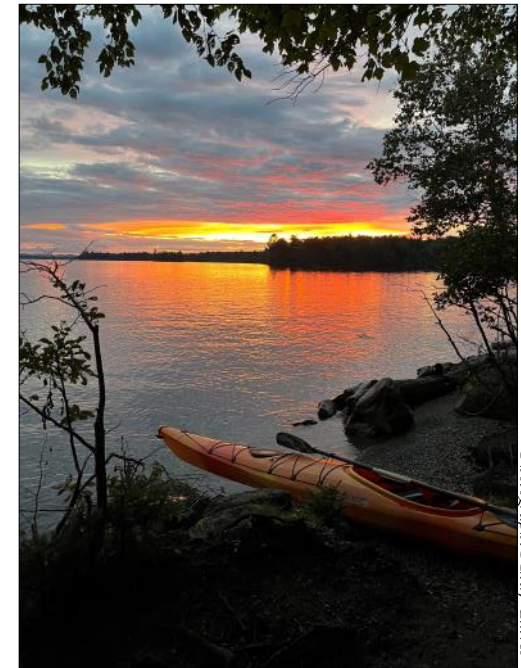

The **Kennebec Land Trust** works cooperatively with landowners and communities to conserve the forests, lakes, streams, wetlands, fields, and wildlife that help define central Maine. KLT protects and stewards land permanently, offers access to conserved properties, provides opportunities for people to learn about and enjoy the natural world, and works with partners to support sustainable forestry and farming.
