

Working forest land and education (forest land managed for timber products as well as for ecological values)

Lands that protect aquifers and drinking water

Lake Islands

Lands with unique or fragile ecosystems including land with rare or uncommon plants and wildlife

Large unfragmented areas of valuable plant and wildlife habitat

Kennebec Land Trust

Land Conservation Values

Significant undeveloped shore land, including especially the shores of undeveloped ponds

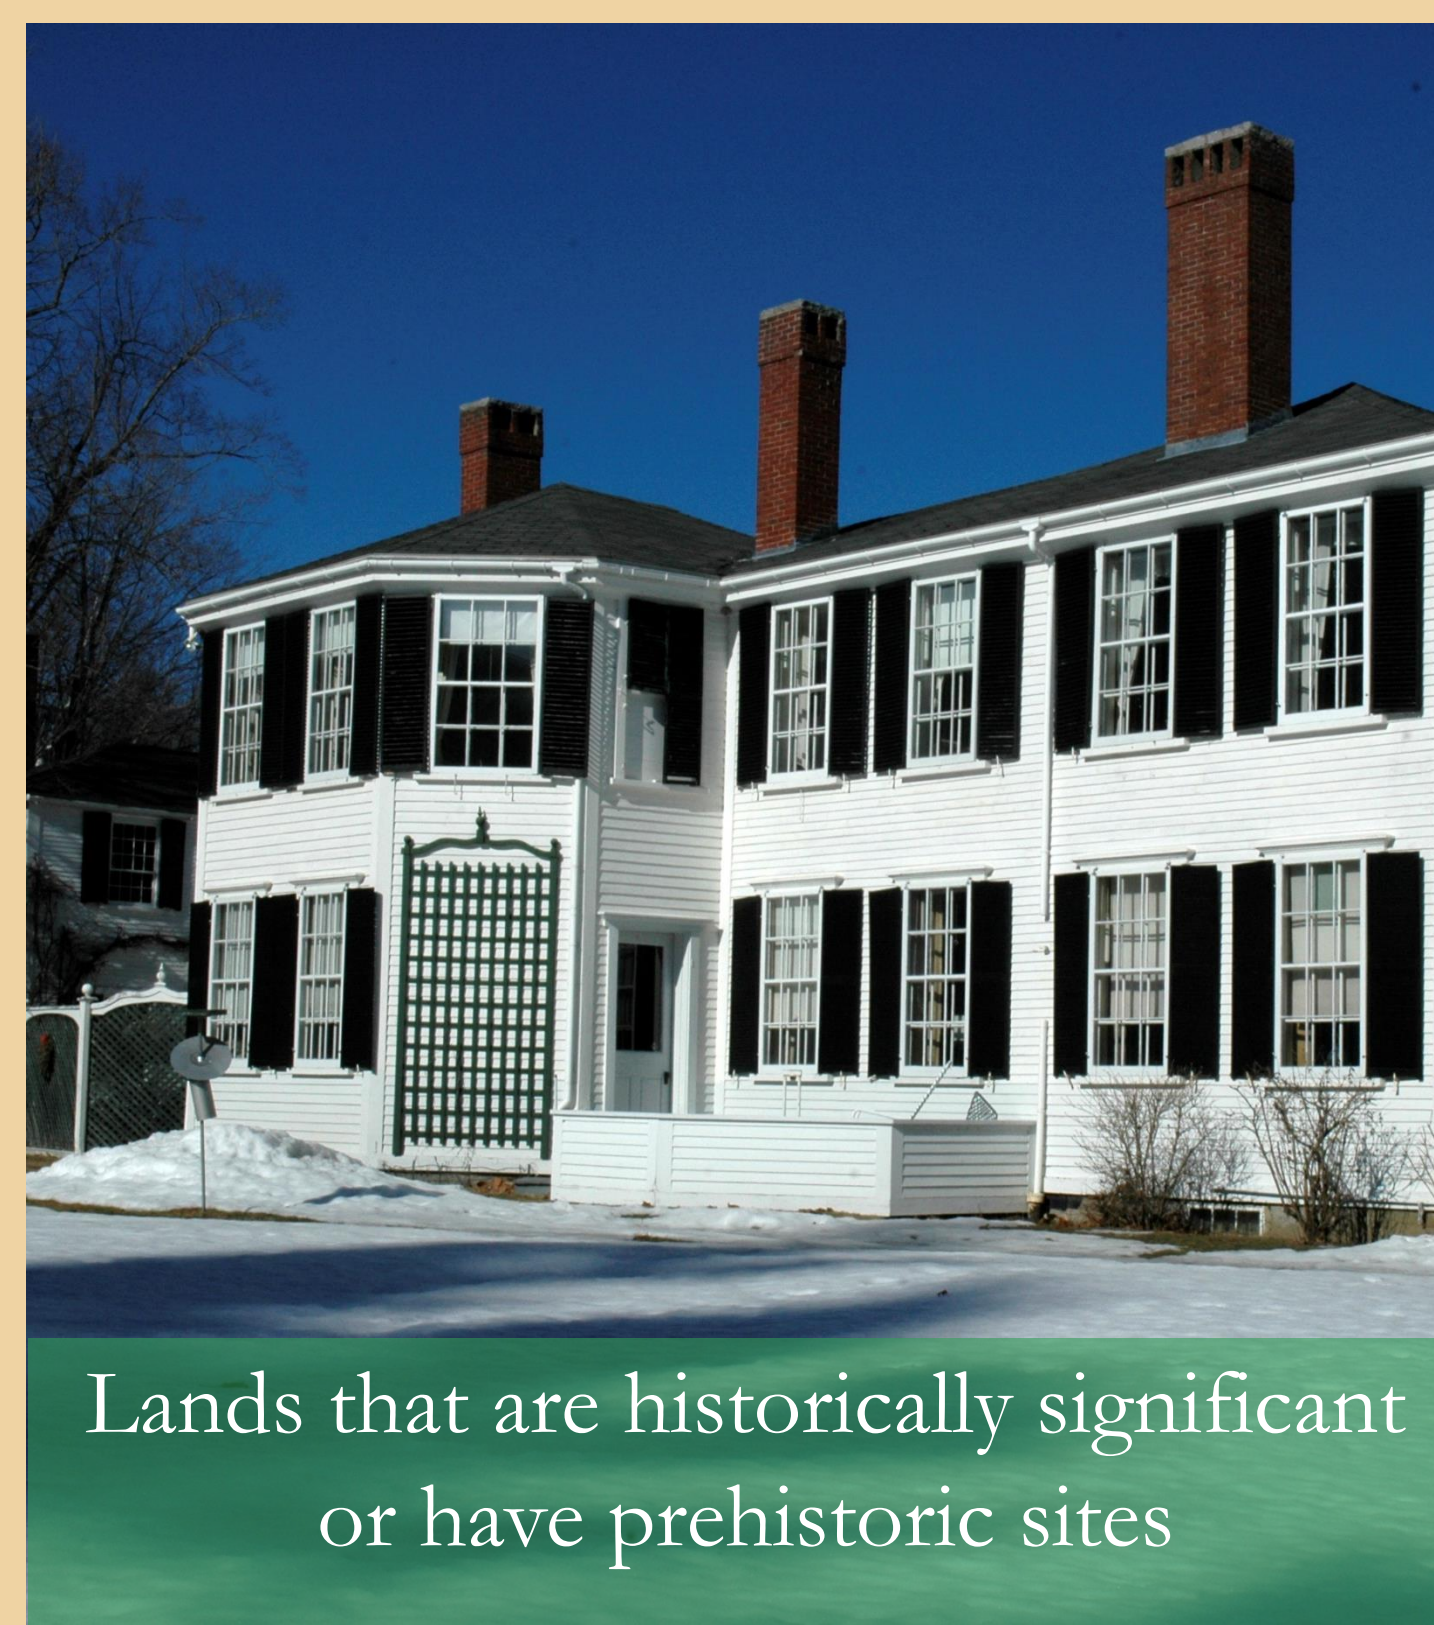

Lands with strong visual qualities including unique geological features

Agricultural Land

Lands that are historically significant or have prehistoric sites

Properties that serve to connect or expand existing conservation properties

In 2013 KLT completed a science-based conservation assessment of our service area that provides guidance for our future conservation projects. The assessment is based on KLT's mission and the ten values represented on this poster, and it takes into account the goals in our communities' comprehensive plans.
